

Solutions Activism Brazil Grassroots Reforestation with Alana Lea of iGiveTrees **FREE**

Wednesday Sept 25 6:30-8pm
South Coast Watershed Resource Center
2981 Cliff Dr Santa Barbara California 93109

Please join Alana Lea and Santa Barbara Permaculture Network as she describes current situations in Brazil's forests, both the Atlantic Rainforest where much of her work is focused, and also an informative and unique perspective of the fires currently burning in the Amazon.

Alana Lea is the founder and Director of iGiveTrees (www.igivetrees.org)

iGiveTrees BRAZIL

Our TREES are all native species of the the most biodiverse remaining rainforests on the planet. At times we interplant food crops.

These TREES are investments in rural rainforest communities. We only partner with local people who are willing to work cooperatively.

FAIR PAY
All participants in the process are fairly compensated, including field maintenance until trees are established.

REGENERATIVE
Mata Atlântica is already 93% gone and Amazonia is in danger. Help local communities restore them.
